Registration Form**

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

NARRATIVE DESCRIPTION

Summary

The Glenwood-Brooklyn Historic District encompasses approximately eighty acres in central Raleigh, North Carolina. The district is the product of a substantial boundary increase of the Glenwood Historic District, listed in the National Register in 1985, as well as a more limited boundary decrease of the original district. The added area is known as the Brooklyn neighborhood and contains approximately twenty acres. The subtracted areas are located along the east edge of the original district and contain several modern buildings, some constructed after the original district was designated. (Refer to district maps for a portrayal of the areas added and subtracted; refer to section 8 for a discussion of the district's designation history.)

The district has the form of a reverse letter L, with its stem--which corresponds to the original Glenwood district--roughly bounded by the Norfolk Southern rail line on the east, the western edge of Glenwood Avenue on the west, Wade Avenue on the north, and West Peace Street on the south. Extending westward from the south end of the stem is the added Brooklyn neighborhood, roughly bounded by West Peace Street on the south, Saint Mary's Street on the west, the Methodist Orphanage and Fletcher Park on the north, and Glenwood Avenue on the east. The west tip of the added area lies across St. Mary's Street from the Cameron Park Historic District. The southeast corner of the district is located 0.7 miles northwest of the North Carolina State Capitol Building, the geographic center of Raleigh. The district is watered by small tributaries of Pigeon House Branch, which is a tributary of the Neuse River, and most of the district area lies at elevations of between 300 and 350 feet above sea level. Street, block, and lot layouts are based on orthogonal city planning but are more irregular, with numerous streets intersecting at non-orthogonal angles. The principal circulatory path is Glenwood Avenue (also an important city thoroughfare), which has a modern landscaped median that follows the course of a street car line discontinued in 1933. Topographically, the Brooklyn neighborhood is somewhat more level and higher in elevation than the original district.

Of the 362 total resources in the Glenwood-Brooklyn Historic District, 242 resources are located in the original district. Of these, 198 (82%) are classified as contributing resources; that is, they were built during the newly defined period of significance (1907-1951) and they retain architectural integrity. (Refer to integrity statement following summary for additional discussion of integrity; refer to section 8 summary for discussion of period of significance.) The number of contributing resources that presently exist in the original district (198) is more than that enumerated in the

Description (continued)

original nomination (168) for two reasons: the original nomination did not count secondary resources such as garages and sheds as contributing resources, and the newly defined period of significance converted some resources built during the period 1938 to 1951 from noncontributing to contributing status. The majority of contributing resources in the original district are residential in character, and of these single-family dwellings predominate. Outbuildings such as garages, storage sheds, and so forth are often associated with dwellings, and the majority of these are also contributing. Other building types represented in the original area include apartment buildings, small-scale commercial buildings, a government laboratory, a church, and a firehouse.

The added area contains 120 resources. Of these, 88 (73%) are classified as contributing resources. The majority of the added contributing resources are residential in character, and of these single-family dwellings predominate. Outbuildings such as garages, storage sheds, and so forth are often associated with dwellings, and the majority of these are also contributing. Other building types represented in the added area include an apartment building, small-scale commercial buildings, a church, and a school.

Architecturally, the original district and the Brooklyn neighborhood are very similar, and therefore they are described together. Contributing dwellings are one story, story-and-a-half, or two stories in height. They are typically of frame construction and most retain historic weatherboard and/or wood-shingle siding. Some houses are of brick construction or have brick veneers. Roofs are typically gabled--either side-gable, gable-fronted, or triple-A--although hip roofs are also common. Brick is the most common material for foundations, chimneys, and flues. Many houses were originally built with porches, which survive in most cases albeit sometimes in modified form. Porch posts and columns are usually of wood or combinations of wood and brick (as with many Craftsman bungalows). Beginning after World War II, deteriorated porch posts and columns were sometimes replaced with decorative metal supports in imitation of nineteenth-century cast ironwork. Windows come in a wide variety of double-hung sash arrangements; casement windows are rare. Doors sometimes have sidelights and/or transoms. Rear ells appear on some houses, primarily those dating to before 1920. (Architectural characteristics that contribute to the district's significance under Criterion C, such as styles, are discussed in the section 8 architectural context.)

The district preserves numerous landscape features from the period of significance. Graveled service alleys provide rear access to lots on many blocks. Concrete sidewalks are standard along most streets and are often bordered on the property side by low stone or brick retaining walls. Mature hardwood shade trees abound, and modern shrubbery, flower beds, and yard areas perpetuate historic landscaping practice. Intrusive modern features such as front-yard parking lots

and wood privacy fences are rare.

Integrity Statement

The Glenwood-Brooklyn Historic District possesses good integrity overall and on a resource-by-resource basis, as detailed and enumerated in the section 7 summary and inventory. The district's original street layout and the pattern of development that arose during the period of significance remain essentially unaltered. Very little demolition has occurred. The weakest block in the district is located in the added Brooklyn area and is bounded by Glenwood Avenue, Devereux Street, North Boylan Avenue, and Hinsdale Street, where the historic Richard Lewis School was rendered noncontributing by a modern front addition and two historic houses were demolished in the 1980s or 1990s to permit a parking lot expansion behind the school.

Adjoining areas and resources retain their basic historic character: railroad tracks to the east, the landscaped grounds of the Methodist Orphanage (now Fletcher Park) to the northwest, Broughton High School to the west. Intrusive modern development is largely limited to the Wade Avenue interchange (visible from the 1400 block of Glenwood Avenue) and scattered modern small-scale commercial and apartment development along the east edge of the district and along W. Peace Street. Because of the district's size these intrusive peripheral conditions are visible from few contributing properties.

As the counts in the description summary indicate, there is a high percentage of resources that retain integrity of feeling, association, workmanship, materials, setting, design, and location. The character-defining architectural features of the district's historic dwellings (the dominant resource type) are retained in most instances. Non-historic (post-1951) residential development is limited and in most cases respects historic patterns of scale and placement.

Two classes of modern alteration of historic dwellings should be noted. One is the late-twentieth-century Colonial Revival remodeling of a number of houses in the Brooklyn neighborhood, which typically resulted in the loss of porches and some original detail, but which rarely affected the overall form, scale, and finish of the dwellings (hence, in general, their classification as contributing resources). More recently the owners of one-story dwellings have expanded their living area by finishing attic spaces or by adding second stories. In some instances this has not altered the basic form or scale of the dwellings as viewed from the street, and the contributing status is retained. Where the scale and form of the house is dramatically altered by this kind of expansion, noncontributing status has been assigned.

Inventory

The inventory list is organized alphabetically by street name (regardless of north, south, etc. prefix) and numerically by street address. The district includes properties on the following thoroughfares: Adams, Brooklyn, North Boylan, Cleveland, Cole, Dale, Devereux, Filmore, Gaston, Glenwood, Hinsdale, Jefferson, West Peace, Pierce, St. Mary's, Tilden, Washington and Wills Forest. Each inventory entry gives the inventory number and the status of the property as contributing (C) or noncontributing (N) to the character of the district, followed by the street address, the known or approximate date of construction, and the resource name, either historic ("James E. Niven House") or generic ("Garage"). The body of the entry describes the style, form, height, construction materials, exterior (and sometimes interior) architectural details, and notable landscape features of a property. It also provides pertinent historical information derived primarily from city directories. For properties that include secondary resources such as garages and sheds, these are given a secondary heading (example: "C a, b, c, etc."). Vacant lots are designated "VL."

Most building dates are derived from city directories (the year a given address first appears in the directory) and from other sources researched by City of Raleigh environmental planning staff during the preparation of the original nomination and by the Historic Glenwood Residents' Association during the preparation of the present nomination. Because first-appearance address dates may differ by a year or two from the date of construction, most dates are assumed to be approximate and are therefore preceded by "ca.", for "circa". When architectural evidence suggests a resource is considerably younger or older than a first-appearance address date, an approximate date is assigned on the basis of the architecture. Multiple dates give the date of original construction followed by dates of major alteration or addition. Historic house names are usually derived from the original occupant, as determined by city directories. Occasionally, when two original occupants are listed, a hyphenated name is assigned, and a similar naming approach is taken when an original occupant and long-term later occupant are known.

Several descriptive terms require definition or elaboration. "Victorian" refers to architecture of the late nineteenth and early twentieth century that is characterized by milled wooden ornament such as turned porch posts, sawn porch brackets, decorative roof vents, and so forth and features such as decorative hip-and-gable and triple-A roofs that indicate the influence of specific styles such as the Queen Anne and Gothic Revival but are not so fully expressed to receive a more specific stylistic identification. Windows (typically double-hung sash) are described by their sash arrangement; for

Description (continued)

example, "6/6" refers to six-over-six sash. "Novelty" weatherboard siding is characterized by rabbeting or other treatment of the board section giving a decorative effect. Unless otherwise specified, "entry" refers to the front entry, wood porch posts have square cross sections, gable roofs have a side-gable configuration (as opposed to front-gabled), and decks and metal porch supports are modern (post-1951).

Status/No. Street Address Name Date

N 1. 500 Adams Street. House. Ca. 1953.

One-story frame Minimal Traditional house with novelty weatherboard siding and an asphalt-shingled gable roof. The front porch has square wood posts. Other features include a cinder block foundation, an interior brick flue, a side entry stoop on brackets, 6/6 windows, and a front picture window.

C 2. 502 Adams Street. James F. Busbee House. Ca. 1922.

One-story frame Craftsman bungalow with weatherboard siding and an asphalt-shingled hip roof. A gabled extension engages the front porch, which has tapered wood posts on massive tapered brick pedestals. Other features include a brick foundation and interior chimney, gable brackets, exposed rafter ends, and 6/6 windows. Busbee was a railroad car inspector.

C 2a. 502 Adams Street. Garage. 1st half 20th c.

One-story frame with asbestos-shingle siding and an asphalt-shingled gable roof.

C 3. 504 Adams Street. Howard W. Brown House. Ca. 1915.

Two-story frame house with synthetic siding and an asphalt-shingled gable roof with diamond-shaped gable vents. The Craftsman one-story front porch has tapered granite pillars on brick pedestals. Other features include a brick foundation and interior chimney with arched cap, an entry with transom, and 4/1 windows. Brown, who was a granite cutter at the Cooper Monument Co., carved the porch pillars.

Two-story frame house with novelty weatherboard siding and an asphalt-shingled hip roof with a gabled ventilation dormer. the one-story front porch has metal supports. Other features include a replacement cinder block foundation, a one-story back porch with wood shingles in the roof ends, two transomed entries to two apartments, and 6/1 windows. 505 Adams is similar in form to 507 and 509 Adams. Wyatt, the occupant in 1918, was a salesman with Thomas H. Briggs & Sons (see 507 Adams). For much of the 1920s and 1930s the house was occupied by watchman Joseph C. Walker.

C 5. 507 Adams Street. Milton B. Holmes House. Ca. 1918.

Two-story frame house with novelty weatherboard siding and an asphalt-shingled gable-front roof. The one-story front porch has paneled square wood columns. Other features include a replacement cinder block foundation, an interior brick chimney, an entry with transom, and 6/1 windows. 507 Adams is similar in form to 505 and 509 Adams. Holmes, the occupant in 1918, was an electrician. For much of the 1920s and 1930s the house was occupied by Jesse H. Wyatt, a salesman with Thomas H. Briggs & Sons (see 505 Adams).

C 6. 509 Adams Street. John L. Gray House. Ca. 1918.

Two-story frame house with novelty weatherboard siding and an asphalt-shingled hip roof with a decorative front gable with a square louvered wood vent. the one-story front porch has classical wood columns. Other features include a replacement cinder block foundation, an interior side parged chimney, an entry with transom, and 6/1 windows. 509 Adams is similar in form to 505 and 507 Adams. Gray, the occupant in 1918, was a railroad flagman. For much of the 1920s and 1930s the house was occupied by policeman Luther C. Thompson.

C 7. 511 Adams Street. James White House. Ca. 1922.

One-story frame Craftsman bungalow with weatherboard siding and a wood-shingled hip roof. A gabled extension engages the front porch, which has tapered and paneled wood posts on brick pedestals and a peaked span. Other features include a brick foundation and exterior side chimney and interior flue, gable brackets, and 4/1 and 6/1 windows. White was a claims adjuster with

Norfolk Southern Railroad.

C 7a. 511 Adams Street. Garage. Ca. 1922.

One-story frame with weatherboard siding on the walls and wood shingle siding in the gables, asphalt roofing, and one vehicle bay.

C 8. 601 Adams Street. Nichols-Copley House. Ca. 1918.

Story-and-a-half frame Craftsman bungalow with novelty weatherboard siding and an asphalt-shingled gable roof with shed dormers on the front and back, the front one with a small balcony. The engaged front porch has wood supports. Other features include a brick foundation and exterior side chimney, diamond-shaped louvered gable vents, a small back vestibule and pantry extension, and 3/1 windows. Railroad flagman Ira S. Nichols and railroad yard conductor Atlas Copley were both listed as occupants of this house in 1918.

C 9. 603 Adams Street. William X. Coley House. Ca. 1922.

Story-and-a-half frame Craftsman bungalow with weatherboard siding on the first story, wood shingle siding on the upper story, and an asphalt-shingled gable roof with a shed dormer. The engaged front porch has tapered wood posts. Other features include an exterior gable-end brick chimney with a battered stack, a side bay window, gable brackets, and 1/1 windows with decorative upper sash. Coley, a circulation manager with the News & Observer Publishing Co., was listed as the occupant of this house from 1923 through 1939.

C 9a. 603 Adams Street. Outbuilding. 1st half 20th c.

Story-and-a-half frame building (a dwelling originally?) with novelty weatherboard siding and a metal-sheathed gable roof.

C 10. 604 Adams Street. Alice R. Allen House. Ca. 1947.

One-story frame house with novelty weatherboard siding and an asphalt-shingled front-gable roof. The modern front porch has square wood columns. Other features include a stepped back parapet wall of cinder block, an exterior side brick chimney, and modern 6/6 windows.

C 11. 605 Adams Street. Derril J. Forrest House. Ca. 1922.

Two-story frame house with weatherboard siding and an asphalt-shingled hip roof. The one-story front porch has wood posts and a modern balcony serving a modern second-story entry. Other features include a brick foundation and interior chimney and modern 1/1 windows. Forrest was a salesman. For much of the 1920s and 1930s the house was occupied by policeman Murphy H. Harris.

C 11a. 605 Adams Street. Shed. 1st half 20th c.

One-story frame with novelty weatherboard siding and a metal-sheathed gable roof.

C 11b. 605 Adams Street. Garage. 1st half 20th c.

One-story frame with horizontal flush-board siding, a metal-sheathed gable roof, and one vehicle bay.

N 11c. 605 Adams Street. Barbecue (brick). 2nd half 20th c.

C 12. 607 Adams Street. Building. 1st half 20th c.

One-story frame building with vinyl siding and an asphalt-shingled front-gable roof. Other features include a gabled entry stoop on brackets, a foundation of brick piers with cinder block infill, a back deck, 6/1 windows, and a front picture window. City directories suggest this small building may have been built about 1924 as the Puryear Grocery & Transfer, C. C. Puryear proprietor. If so, it appears to have been remodeled as a dwelling in later years.

C 13. 702-04 N. Boylan Avenue. House. Ca. 1937.

One-story frame Craftsman duplex with weatherboard siding and an asphalt-shingled hip roof with a hip dormer. Other features include a front porch on wood posts, a brick foundation and interior flues, exposed rafter ends, double rear screened porches, and 6/1 windows. 706-08 N. Boylan, located next door, was originally similar to this house in form and detail.

Description (continued)

One-story frame duplex with vinyl siding and an asphalt-shingled hip roof remodeled in the Colonial Revival style about 1980. Other features include a brick foundation and interior flue, a stoop with Chinese Chippendale railing, wood-barred foundation vents, double rear screened porches, historic 6/1 windows, and modern 9/9 windows. The house was originally similar in form and detail to 702-04 N. Boylan, located next door.

C 15. 717 N. Boylan Avenue. Alexander D. Bradley House. Ca. 1924; ca. 1980.

Story-and-a-half frame Craftsman bungalow remodeled in the Colonial Revival style about 1980, with weatherboard siding and an asphalt-shingled gable roof with large front and rear shed dormers. The engaged front porch has stout wood posts and a Chinese Chippendale railing. Other features include a brick foundation and exterior gable-end chimney, wood-barred foundation vents, a gable-end bay window, and 6/1 windows. Bradley, listed as the occupant in 1924, was a sheet metal worker. Police detective Herbert L. Peebles occupied the house in the 1930s.

C 16. 719 N. Boylan Avenue. Jewell and Nellie Burch House. Ca. 1924 ; ca. 1980.

One-story frame Craftsman bungalow remodeled in the Colonial Revival style about 1980, with weatherboard siding and an asphalt-shingled hip roof. The engaged front porch has stout wood posts with sawn brackets and a Chinese Chippendale railing. Other features include a brick foundation and exterior side and interior chimneys, wood-barred foundation vents, and 6/1 windows. Jewell R. Burch, a widow, and Miss Nellie E. Burch, a nurse, were listed as occupants in 1924.

C 17. 725 N. Boylan Avenue. Jenkins Memorial United Methodist Church. 1916; ca. 1950.

Brick church with Gothic Revival and Romanesque Revival stylistic influence, corner entry towers, a nave form, and a brick-faced cinder block side addition of ca. 1950 for classrooms and offices. The exterior is distinguished by mostly round-arched stained-glass windows and louvered belfry openings with double, triple, and quadruple courses in the arches. Concrete is used for buttress weatherings, window sills, and copings. The taller north corner tower has a circular window and belfry. Other exterior features include a slate-shingled gable roof with parapet ends, corbeled cornices, a marble inscription plaque, and a side handicap ramp. The two front entries open into vestibules at the bases of the towers which are linked by a transverse passage with a wide opening into the sanctuary. The sanctuary has a stained beaded matchboard ceiling divided by beams, a gallery, segmental and basket-handle chancel arches, and an altar dais with a low ornamental railing. The north side windows depict the life of Christ; memorial windows in the transverse

passage were donated by the boys and girls of the Methodist orphanage and by the children of the Glenwood neighborhood.

The Brooklyn neighborhood Methodist congregation grew out of an 1875 prayer meeting held at the future site of the neighborhood. Land for the church and a school was given in 1876 and by 1881 a church building had been erected. The present building is named for a later pastor, the Rev. John Wesley Jenkins, who worked to establish the Methodist Orphanage north of the Brooklyn neighborhood. A frame church with Victorian ornament and corner towers was built in 1906-07 at the present site; it burned in 1914 and was replaced by the present brick building in 1916. The children and workers at the orphanage attended Jenkins Memorial, which now serves its original Methodist congregation and an Episcopalian congregation.

Other features include interior brick chimneys on the back wall of the house, a one-story hip-roofed ell with an exterior end brick chimney, an entry with Craftsman sidelights and transom, reworked peaked vents in the gables, and 2/2 windows. Johnson, a carpenter, lived here through 1940.

C 87. 510 Devereux Street. DeWitt L. De Lamater House. Ca. 1922.

Two-story frame Craftsman house with weatherboard siding and an asphalt-shingled hip roof with a hipped dormer. A two-tier porch with clustered wood posts is recessed into the front west corner. Other features include a brick foundation (mostly parged) and exterior side chimney, two-story side wings, and 6/1 windows, some in groups of two. De Lamater was a traveling salesman. In the 1930s the house was occupied by Robert L. Bridger.

N 88. 601 Devereux Street. Richard Lewis School. 1914; 1917; 1940; 1950s.

Two-story brick Classical Revival school with 1950s International Style addition to front (east) elevation. The original section features decorative brickwork in the cornice and forming panels on blank end walls, with engaged two-tier corner circulation porches, mid-20th-c. sash in historic window openings, a flat roof, and a basement level. The 1950s front addition has a stretcher-bond brick veneer, rows of aluminum-framed windows, concrete bands at the first- and second-story ceiling levels, and a one-story glass-ended hyphen that connects to the original building. On the rear (west) elevation of the original section is a utilitarian one-story brick auditorium added in 1940. A parking lot and playground extend behind the school to N. Boylan Ave. A library was created in the school in 1928.

C 89. 602 Devereux Street. Paul D. Allen House. Ca. 1909.

One-story frame Victorian house with weatherboard siding and an asphalt-shingled triple-A roof with diamond-shaped louvered wood vents in the gables. The front porch has wood posts with molded caps. N 90. 610 Devereux Street. House. Ca. 1953.

One-story stretcher-bond brick-veneer Ranch house with an asphalt-shingled front/side gable roof with weatherboard siding in the gables. Other features include a brick foundation and interior flue, a front patio under a pergola, and 6/6 and 8/8 windows.

C 91. 620 Devereux Street. Chester A. Sallinger House. Ca. 1915.

Two-story frame Victorian house with weatherboard siding and a slate-shingled triple-A roof with kite-shaped louvered wood vents in the gables. The one-story front porch has turned posts and slate roofing. Other exterior features include a brick foundation and interior rear chimneys, cornice returns, a one-story ell with deck, and an entry with transom and door with glass panel. The center-passage-plan interior features Victorian, Classical Revival, and Craftsman mantels, a stair with a paneled closed stringer and square-section newels and balusters, and plain door and window surrounds with turned corner blocks. 620 Devereux is similar in form to 622 and 624 Devereux. Sallinger was a railroad conductor. Salesman Robert S. King occupied the house in the late 1930s.

C 92. 622 Devereux Street. James S. Fulghum House (first). Ca. 1915.

Two-story frame Victorian house with weatherboard siding and a slate-shingled triple-A roof with kite-shaped louvered wood vents in the gables. The one-story front porch has turned posts, spindle brackets, and slate roofing. Other exterior features include a brick foundation (mostly parged), cornice returns, an entry with sidelights and transom, and modern 1/1 windows. 622 Devereux is similar in form to 620 and 624 Devereux. Fulghum was a bookkeeper with T. B. Crowder & Son, wholesale/retail grocers. He later lived at 615 Wills Forest. Emmett V. Hunnicutt, a roundhouse foreman with the Seaboard Air Line, occupied the house in the late 1930s.

in form to 620 and 622 Devereux. Castlebury was a dentist. An occupant of the house in the 1920s was Charles E. Meeler, a special agent with Norfolk Southern.

N 93a. 624 Devereux Street. Shed. 2000.

One-story frame shed with weatherboard siding and an asphalt-shingled gable roof.

C 94. 700 Devereux Street. Charles F. Vaden House. Ca. 1909; ca. 1980.

Two-story frame house with weatherboard siding and an asphalt-shingled hip roof with a hipped dormer. A stair-hall side window with a stained-glass border suggests the house was originally Queen Anne in style, but most original stylistic features, including the front porch, were erased during a ca. 1980 Colonial Revival remodeling. Other features include a brick foundation (mostly parged) and exterior side flue, and an entry with a transom and blocked sidelights. A modern plank fence with Colonial Revival finials surrounds the yard. Vaden was an engineer. The occupant during the 1930s was Maggie Powell.

N 94a. 700 Devereux Street. Shed. Ca. 1980.

One-story frame storage building in the form of a traditional meathouse with weatherboard siding and a wood-shingled pyramidal roof with a wooden finial.

N 95. 708 Devereux Street. Walter N. Richards House. Ca. 1911.

Story-and-a-half frame Craftsman bungalow with weatherboard siding on the first story and wood shingle siding on the second story, and an asphalt-shingled gable roof. The engaged front porch has been enclosed with framing and aluminum siding for living space and an entry recess with arched span created. Other features include a brick exterior gable-end chimney and exterior side stairs. Richards, an engineer, occupied the house through 1926. James G. Upchurch, county Superintendent of Building and Grounds, lived there in the 1930s.

C 96. 709 Devereux Street. Leonard A. Aycock House. Ca. 1913

One-story frame Victorian house with weatherboard siding and an asphalt-shingled triple-A roof with diamond-shaped louvered wood vents in the gables. The front porch has modern turned posts. Other features include a foundation of brick piers with cinder block infill, cornice returns, and 4/4

Other features include a foundation of brick piers with brick infill, a parged interior flue, and 2/2 windows. Butts was an agent with Durham Life. He is listed as the occupant until 1932, after which his widow lived in the house.

C 99a. 715 Devereux Street. Garage. 1st half 20th c.

One-story frame with weatherboard siding, an asphalt-shingled gable roof, and one vehicle bay.

C 100. 716 Devereux Street. Daniel S. Grady House. Ca. 1911.

Story-and-a-half frame Craftsman bungalow with weatherboard siding and an asphalt-shingled gable roof with a shed dormer. The engaged front porch has tapered wood posts on brick pedestals. Other features include a brick foundation and interior flue, asphalt-shingle sheathing in the gables, exposed rafter ends, and 4/4 windows. Grady was a carpenter. Policeman T. Gordon Taylor lived here in the 1930s. The Craftsman characteristics may indicate an early remodeling.

N 101. 719 Devereux Street. Glenwood Grocery. Ca. 1915; 2000.

Two-story frame store with concrete/wood-fiber weatherboard siding and a metal-sheathed front-gable roof. A cut-away corner entry was recreated in a 2000 rehabilitation. Other features include a cinder block foundation, modern gable brackets, and modern 4/4 windows with transoms over those on the first story. J. F. Peatross was the proprietor of the store in 1918. In the mid-20th century the store belonged to Alexander Nordan. According to his daughter, Linda Champion, Nordan used the front of the first floor as his store and the space above for storage. The back (south end) of the first and second floors were used as a dwelling. The store featured a meat section, well-stocked penny candy counter, and bicycle-riding delivery boys. The upper floor once contained the Glenwood Council Jr. OUAM.

N 101a. 719 Devereux Street. Outbuilding. 2000.

exterior features include a foundation of brick piers with cinder block infill, an interior brick chimney, an enclosed back porch, a back deck, a decorative front window, and 2/2 windows. The interior plan is centered around the central chimney, with angled fireplaces serving four rooms. The mantels are elaborate and varied, with Classical Revival, Romanesque, and Art Nouveau influences and colorful tile fireplace surrounds. Ferguson was an engineer. From 1923 to 1939 the house was occupied by Alonzo H. Sorrell, a tinner and later a driver, and Miss Norma A. Sorrell, a saleswoman for Boylan-Pearce.

C 262. 614 Wills Forest Street. Britt-Bledsoe House. Ca. 1917; ca. 1980.

Two-story frame house with a ca. 1980 Colonial Revival remodeling, vinyl siding, and an asphalt-shingled gable roof. The original porch was replaced with brick steps to the front entry. Other features include a brick foundation and interior chimney with corbeled cap, a peaked louvered wood vent in one gable, and 6/6 with paneled shutters. The occupants of this house in 1917 were Hunter P. Britt, a salesman with the C. R. Boone men's clothing store, and Miss A. W. Bledsoe, a teacher at Lewis School.

Two-story frame Victorian house with weatherboard siding and an asphalt-shingled front/side gable roof. The one-story wraparound Craftsman porch has tapered posts and a decorative gable aligned with the entry. Other features include a brick foundation and interior chimney, a cinder block foundation under the porch, chevron-pattern beaded matchboard sheathing and a peaked and pierced vent in the front gable, cornice returns, an entry with sidelights, and 12/1 windows. Britt, a salesman, lived here briefly before moving next door to 614 Wills Forest. Machinist William S. Yates lived here from 1917 to 1928.

C 265. 617 Wills Forest Street. Cora Coley House. Ca. 1913.

One-story frame Victorian house with asbestos-shingle siding and an asphalt-shingled hip roof. The front porch has chamfered posts with simple brackets. Other features include a foundation of brick piers with brick infill, a brick interior chimney, a back porch, and 4/1 windows. Coley was a widow. In the 1930s fireman Joseph H. Allen lived here.

One-story frame Victorian house with asbestos-shingle siding and a slate-shingled hip roof with a hipped ventilation dormer. The front porch has chamfered posts with sawn brackets and vasisform balusters, the latter salvaged from a Victorian house located near the Capitol that was demolished in the 1960s. Other features include a brick foundation and interior chimney, a decorative front window, and 6/6 windows. 619 Wills Forest was originally virtually identical in form and detail to 621 and 623 Wills Forest. Faucette was a carpenter. The Jennette family lived here from 1928 into the 1990s. Hubert B. Jennette was a clerk with the Seaboard Air Line.

C 268. 620 Wills Forest Street. Jones-Andrews House. Ca. 1923.

Two-story frame Foursquare-form house with weatherboard siding and an asphalt-shingled hip roof with a hipped dormer. The one-story front porch has tapered wood posts and extends to form a porte cochere. Other features include a brick foundation and exterior side flue, an interior parged chimney, and 8/1 windows. Pharmacist Otis V. Jones and carpenter Albert G. Andrews lived here in 1924. Iona B. Andrews, a clerk with Western Union Telegraph Co., also lived in the house in 1924. From World War II to the 1980s the house was occupied by the Woodell family.

C 269. 621 Wills Forest Street. Laster-Upchurch House. Ca. 1913.

One-story frame Victorian house with novelty weatherboard siding and an asphalt-shingled hip roof with a hipped ventilation dormer. The front porch has metal supports. Other features include a brick foundation and interior chimney, a decorative front window, and 6/6 windows. 621 Wills Forest was originally virtually identical in form and detail to 619 and 623 Wills Forest. Malcolm M. Laster was a bookkeeper with the Ferrall Co. dry goods store. From 1926 until the 1990s this was the home of printer and collector Herman E. Upchurch.

C 270. 622 Wills Forest Street. Balus J. Holleman House. Ca. 1924.

One-story frame Craftsman bungalow with weatherboard siding and an asphalt-shingled gable roof. The engaged front porch, which is screened and has a paneled frieze, has been altered one or more times in the past decades. Other features include a cinder block foundation, an interior brick chimney, brackets and wood shingle siding in the gables, a window in the porch gable, rectangular louvered wood vents in the house gables, and 6/6 windows. Holleman was a shop foreman with the Rawl Motor Co.

NARRATIVE STATEMENT OF SIGNIFICANCE

Summary

The Glenwood-Brooklyn Historic District expands the boundaries of the Glenwood Historic District (listed in the National Register in 1985) to include most of the adjoining Brooklyn neighborhood in Raleigh, North Carolina. The areas were developed conjointly by the Glenwood Land Company in the early twentieth century as street car suburbs of Raleigh. The new district is therefore the product of a boundary increase of the original district, as well as a small boundary decrease (described in the section 7 summary and supported in the section 10 boundary justification statement), and the new district name reflects the inclusion of both areas. This nomination documents the added area and provides additional documentation for resources within the original area. According to the City of Raleigh, the sponsor of the original and present nominations, at the time the original nomination was in preparation the Brooklyn area was not included because it was felt that house remodelings then in progress would ultimately compromise the area's integrity. As this nomination documents, the historic resources of the Brooklyn area have retained sufficient integrity for National Register designation.¹

The Glenwood-Brooklyn Historic District meets Criteria A and C in the areas of community planning and development and architecture. In the words of the original nomination, the "Glenwood suburb represents the first major documented attempt by the city's controlling interests to accommodate the rapidly growing white middle class of early 20th century Raleigh." The same statement applies to the Brooklyn neighborhood, which was integral with the Glenwood development. The district is architecturally significant for the range of early-twentieth-century house types, methods of construction, and styles represented in both the original district and the addition. The architectural development of the two areas is so similar as to necessitate joint description in the text. Although the Glenwood-Brooklyn neighborhood in its present form was conceived in 1905-07, no resources are known to survive from before 1907. On the basis of architectural significance the period of significance for the original district (1907-1937) has been extended to 1951, the approximate division point between the primarily historicist styles that characterized development during the first half of the twentieth century (described in the architectural context) and the Modernist and Ranch styles that followed. Although the district experienced some construction after 1951, these resources are not exceptionally significant.²

Community Planning and Development Context

The incorporation of the Glenwood Land Company in May 1905 marks the beginning of the Glenwood and Brooklyn neighborhoods. Limited residential development had occurred in the area for many years previous, however, as documented by architectural historian and former neighborhood resident David Black. According to tradition, the Brooklyn area was originally known as Will's Forest, which is said to have taken its name from a free black named Will who lived there in the late 1700s. In the mid-nineteenth century, John Devereux Jr. (1820-93), whose wife Margaret Lane Mordecai Devereux (1824-1910) inherited land contained in the historic district, built a house in the vicinity of the south end of the Glenwood neighborhood which he named Will's Forest. After the Civil War the Mordecai-Devereux lands were subdivided into several farms. One was owned by Devereux's daughter Ellen, who with husband John Hinsdale built a house known as Glenwood on the northwest corner of the present Glenwood Avenue and West Peace Street. Another daughter and her husband, Mary and Arthur Winslow, acquired the eastern portion of the present Brooklyn neighborhood. An 1876 deed referred to the general area as the "Wills Hill settlement," and there is other evidence of limited residential development in the district and vicinity during the late nineteenth century, including a subdivision of the Winslow property in 1887.³

In May 1905 James H. Pou, Albert Murray and William J. Andrews incorporated the Glenwood Land Company for the purpose of developing the Glenwood-Brooklyn area into residential neighborhoods. Pou, according to architectural historian Charlotte V. Brown, author of the original

Foremost among these was the Raleigh Historic District Commission, the nomination's sponsor, represented by Executive Director Dan Becker, and the Historic Glenwood Residents' Association, Inc., represented by President Phil Poe. Members of the Residents' Association gathered historical data from city directories for inclusion in the inventory entries. David and Allison Black, architectural historians and former district residents, also provided considerable assistance.

Glenwood nomination, "was fitted to play a substantial role in the urbanization of Raleigh." An accomplished trial lawyer, Pou was also involved with the Raleigh Electric Company and the Carolina Power & Light Company. Pou and the others' Glenwood Land Company focused first on subdividing (or re-subdividing) land in the Brooklyn neighborhood and offering lots for sale in 1905. In June 1906 the company registered a plat of the present Glenwood neighborhood, extending from West Peace Street to Wade Avenue. About the same time a street car line was extended down Glenwood Avenue, which became the development's grand concourse. New streets were laid out and given the names of United States presidents (including one contender, the 1876 popular vote winner Samuel J. Tilden).⁴

Charlotte V. Brown writes: "Glenwood was the product of the growing town [of Raleigh], its diversifying economy, the rise of the middle class, rural in-migration, urban out-migration and changing patterns of landholding and tenancy. Glenwood [was] also the product of the energy and ideals of men whose importance, prestige, power and wealth (or access to wealth) affected the urbanization of the city and the south." James Pou and his associates appear to have marketed their development to a specific sector of the population. Blacks were excluded by deed covenants, and poor whites were effectively excluded by the costs of purchasing a lot and building a residence (the latter could cost no less than \$1,500, it was reported at the time). According to Brown, the resulting population of the Glenwood neighborhood was "blue collar and lower middle class with a smattering of the professionals from the middle and upper middle classes." City directories describe a similar population mix in the Brooklyn area, and the architecture of both areas reflects this diversity, as discussed below.⁵

The Glenwood-Brooklyn area was the first of several suburban developments that launched Raleigh's western and northern expansion during the early twentieth century. Its development came at a time when Raleigh's city limits were enlarged--the first expansion in a half century--and the city's population increased by about forty percent during the first decade of the century. The Glenwood-Brooklyn area was shortly followed by the Cameron Park and Boylan Heights suburbs (also listed in the National Register of Historic Places in 1985) and by a subsequent James Pou development named Bloomsbury, begun in 1911 and accompanied by an amusement park of the

same name. Charlotte V. Brown, in her article "Three Raleigh Suburbs: Glenwood, Boylan Heights, Cameron Park" (1985) cited three reasons for the development of her three topic neighborhoods. The first was a need for housing in the growing city, and, secondly, housing specifically for workers in expanding areas of government, education, and the service sector of the economy. The third factor had to do with what Brown referred to as "a heightened sense of class based on the new social and economic institutions which had begun in the years after Reconstruction." Brown pointed out that the city's population "was becoming more segregated not only along racial lines, but also along class lines." Glenwood and its sister developments met these new needs.⁶

The enthusiasm generated by the Glenwood-Brooklyn development was expressed by Raleigh businessman Fred Olds, writing in the 1907 annual report of the Chamber of Commerce: "The northern suburb, Glenwood, has been developed remarkably. During the year 100 lots have been sold out of a total of 500, of which less than half so far have been put on the market. Contracts have been made for 26 residences . . . and these are built or underway." In June 1908 the Glenwood Land Company attempted to close out its development by holding a lot auction. According to the local press the auction met with considerable success; over a hundred lots priced between \$175 and \$600 were sold.⁷

The Methodist church played an important part in the life of the district. In 1876 John Devereux gave land for a church and schoolhouse in the Brooklyn vicinity, and by 1881 Brooklyn Church had been constructed. The church was instrumental in the location of the Methodist Orphanage on a fifty-acre parcel adjoining the district, which was purchased in 1908 from the Glenwood Land Company. The orphans attended church and patronized stores in the Brooklyn neighborhood, and they donated memorial stained-glass windows to Jenkins Memorial United Methodist Church, the successor to Brooklyn Church. Another important institution in the Brooklyn area was the Richard H. Lewis School. At the beginning of the twentieth century, the Brooklyn School, as it was then known, moved from West Peace Street to North Boylan Avenue and ultimately to its present location at 601 Devereux Street where it took the name of school board member Dr. Richard H.

Lewis. In the 1926-27 school year 730 students were enrolled, instructed by twenty teachers.⁸

Raleigh city directories provide information on the demographics of the district during its early decades. As Charlotte Brown observed in the original nomination, residents were drawn primarily from the middle class. Government employees, small business owners, and salesmen and saleswomen were common occupations. At least forty-eight houses were occupied by railroad employees at some point during the period 1909 to 1940. Norfolk Southern and the Seaboard Air Line were the principal railroad employers. Representative railroad occupations included conductor, car inspector, flagman, yard master, engineer, brakeman, claim adjustor, dispatcher, freight agent, car repairman, boilermaker, clerk, telegraph operator, and roundhouse foreman. A number of engineers, machinists, and boilermakers who were not listed as railroad employees may in fact have also worked for the railroads. Mixed in with their middle- and working-class neighbors were a few individuals whose occupations--and houses--suggest higher income. Two of the largest and most sophisticated early houses in the district, 1218 and 1220 Glenwood Avenue, were occupied (respectively) by a dentist and an attorney in 1915.⁹

In line with national trends, home construction in the district subsided during the materials shortages of the World War I period but rebounded with the economic boom of the early to mid-1920s. A slackening of demand that preceded the stock market crash of 1929 and the severe depression that followed curtailed construction, although limited home building recommenced during the somewhat improved economic picture of the late 1930s. World War II brought another hiatus but also an increase in demand. The effects of 1940s housing shortages is illustrated by the little dwelling at 510-1/2 Tilden Street--a converted chicken house. Home construction in the district was limited by at least two factors after World War II. Most lots had been developed, precluding later development except as infill. Also, population growth shifted to newer suburbs located on the urban periphery.¹⁰

Statement of Significance (continued)

Charlotte Brown reports that the Glenwood neighborhood was considered to have remained "fairly stable until about 1950," followed by a gradual decline. Brown cites increased automobile traffic along the arterial routes that border the district, increased rental use of dwellings and absentee landlordism, and the death of original inhabitants as negative factors affecting the neighborhood, and a similar decline occurred in the Brooklyn area. Raleigh Historic Properties Commission member Linda Harris Edmisten described the challenges and opportunities experienced by the neighborhood in her essay "Planning and Conservation in Raleigh's Glenwood Neighborhood" (1985). Edmisten credited city planning director A. C. Hall Jr. for his efforts to preserve the neighborhood's residential character in the face of commercial development pressure, and she identified a potential unintended negative consequence of the neighborhood's listing in the National Register of Historic Places, which at the time made tax credits available only for the rehabilitation of income-producing properties and which, Edmisten feared, might have encouraged the conversion of dwellings into offices or other non-residential uses.¹¹

Glenwood-Brooklyn's downward slide reversed during the last quarter of the twentieth century. Edmisten noted a contributing factor; in the early 1980s a portion of the Methodist Home property located across Glenwood Avenue from the original district was developed as the Bishop's Park condominium complex, demonstrating that the area could be successfully marketed to Raleigh's burgeoning class of young urban professionals. The growth of the preservation ethos during the same period and renewed interest in the architectural styles of the early twentieth century fostered appreciation for the neighborhood, and the area's proximity to the downtown also contributed to its rebirth. Today the health of the Glenwood-Brooklyn area is demonstrated by its robust community life, high property values, and busy remodeling and rehabilitation activity.¹²

Statement of Significance (continued)

The Glenwood-Brooklyn Historic District includes a broad range of house types and styles from the first half of the twentieth century. The district's architectural character reflects a variety of factors, among them stylistic and cultural influences, economic trends, and the income level of residents. When development commenced in 1907, vernacular and Victorian influences were still strong in the region's domestic architecture. The district's earliest houses, those built from 1907 to the mid-1910s, usually have simple symmetrical massing with rear kitchen and dining room ells, and one-room-deep center-passage and two-room plans appear to predominate. One- and two-story versions of these houses are found; examples include the one-story William S. Ford House at 719 Gaston Street and the group of matching two-story houses on the 600 block of Devereux Street (620, 622 and 624). These house forms represent the continuation of nineteenth-century regional vernacular tradition. Similar houses were built in rural areas and small towns throughout North Carolina and adjoining states. And, as was typical for middle-class dwellings of the type, weatherboarded frame construction was typical.

The houses noted above also illustrate the persistence of Victorian stylistic influence. In the district this influence is typically expressed by the presence of features such as decorative (non-functional) gables, turned and sawn millwork ornament in porches and gables, and (less frequently) decorative sheathings such as novelty or German siding and shaped wood shingles. Represented in the district is a roof type known to students of North Carolina architecture as the triple-A roof, which features a decorative gable on the center of the forward-facing slope of the main gable roof (making three gables, hence triple "A"). The roof type is ultimately derived from mid-nineteenth-century Gothic Revival domestic architecture, and it appears in the aforementioned houses on the 600 block of Devereux Street. Common milled ornament in the district includes turned porch posts, sawn and spindlework porch post brackets, and louvered gable vents, the latter typically diamond-shaped in form but occasionally also quatrefoil (four-lobed) and triangular. Mass-produced milled ornament became readily available in the late nineteenth century with the establishment of mechanized sash and blind factories.¹³

Relatively speaking, most of the district's Victorian houses are fairly reserved in character. Elaborately ornamented houses such as appear in Raleigh's Oakwood neighborhood are not found in the Glenwood-Brooklyn Historic District. This architectural reserve probably reflects the middle-

¹³ Architectural historians Virginia and Lee McAlester use the term Folk Victorian to describe similar houses in their *Field Guide to American Houses* (pp. 308-317).

class means of the typical neighborhood resident. There are exceptions, however. Several lot owners, especially on Glenwood Avenue, built fairly substantial houses in a Victorian genre known as the Queen Anne style. Primary elements of the style found in the district include irregular massing and roof lines, turrets, and wraparound verandas. Secondary details include decorative window sash and classical allusions. Examples of Queen Anne houses include the John W. Keyes House at 800 Glenwood Avenue, which features an octagonal corner tower with a pyramidal roof; the J. Martin Fleming House at 1218 Glenwood Avenue, with its spreading gable roof, elliptical and bay windows, and a wraparound veranda supported by classical columns; and the ca. 1915 James A. Bridgers House at 800 North Boylan Avenue, which has a prominent gabled dormer with a Palladian window, a false keystone, and turned pilasters. Architectural historian and former neighborhood resident David Black notes that the district's Queen Anne houses typically exhibit Colonial Revival influence. At the other end of the Victorian-vernacular spectrum was a working-class house type known as the shotgun, characterized by its narrow linear form, front-gable orientation, and typically one-story height. A dwelling with shotgun characteristics is the story-and-a-half William Fain House at 709 Gaston Street, built about 1909 and occupied at the time by one of the district's few African Americans.¹⁴

Victorian influence appears in a few houses built as late as the early 1920s (the ca. 1922 W. Rufus Blackley House at 1300 Filmore Street is an example), but generally speaking the style was eclipsed by the Craftsman style beginning in the mid-1910s. The characteristic Craftsman house type, nationwide as well as in the district, was the bungalow, a snugly proportioned house of one or one and a half stories. Almost all Craftsman bungalows have front porches, and most of these are engaged (incorporated) under the house roof. Other common Craftsman bungalow features include large dormers that expanded upstairs living space, porch supports with wood posts (usually tapered and sometimes clustered) on brick pedestals, wood-shingle sheathing in gables and on dormers, gable brackets (usually triangular in form, sometimes appearing like purlin ends), and double-hung windows with upper sash composed of three or more vertical panes. Unlike the vernacular Victorian houses that preceded them, the district's Craftsman bungalows were not strongly influenced by regional architectural traditions. Because the type was disseminated nationwide through plan books, magazine articles, and even as kits distributed by Sears Roebuck, Alladin Homes and other mail-

¹⁴ David Black personal communication. According to James Thomas Irving (b. ca. 1896), Raleigh's first African American mail carrier, Brooklyn Street formerly had numerous shotgun houses, although this is hard to reconcile with the 1914 Sanborn map for the area, which shows few if any shotgun houses (interview in Kinney, "728 Gaston Street").

order firms, the same bungalow could appear anywhere. Also unlike earlier houses in the district, Craftsman bungalows usually dispensed with rear wings by incorporating the kitchen and dining room into the house envelope. Most of the district's Craftsman bungalows were built during the late 1910s and early to mid-1920s, although some were built during the late 1930s after the worst effects of the Depression subsided.

Slightly over eighty Craftsman bungalows stand in the district, most clustered along the back streets of the Glenwood area. Two basic gable roof forms are represented: side-gable and front-gable. Side-gable roofs are typical of the earlier and more finely appointed bungalows whereas front-gable roofs appear on later and more modest examples. Although they were relatively modest in scale and proportion, several bungalows exhibit a high level of quality in their construction. One is the ca. 1917 Askew-Daugherty House at 1000 Glenwood Avenue, which is distinguished by wood-shingle siding, stone porch pillars, and window surrounds that show the influence of Japanese design. Representative of the more modest later bungalows is the ca. 1938 Euclid H. McWhorter House at 507 Tilden Street, a front-gabled one-story dwelling similar in form and scale to the shotgun houses of earlier decades.

Not all Craftsman houses were bungalows; a few two-story Craftsman houses such as the ca. 1923 Arthur B. Morgan House at 509 Cleveland Street and the ca. 1922 Louise E. Gerow House at 1120 Filmore Street were constructed. Nor were all Craftsman houses purely Craftsman in style--some were blended with another popular style of the period, the Colonial Revival. Most of the district's hybrid Craftsman/Colonial Revival houses stand on prestigious lots along Glenwood Avenue. The ca. 1923 house at 1200 Glenwood Avenue, which has a colonial brick first story capped by a shed-dormered Craftsman second story, and the conservatively detailed two-story brick Thomas E. Dowdy House at 1416 Glenwood Avenue (ca. 1924) are examples.

Next to the Craftsman style the Colonial Revival was the most popular idiom during the period between the world wars. Approximately twenty houses and one apartment house, most dating to the 1920s, show the predominant influence of the style, which is usually expressed by brick construction with contrasting white trim, symmetrical compositions, and classically-derived detail. Two particularly well-developed examples stand on Glenwood Avenue. The story-and-a-half Roy T. Parker House, built about 1927 at 810 Glenwood Avenue, has a symmetrical three-bay facade with a gabled entry stoop echoed by gabled dormers on the roof. Somewhat more grandiose is the ca. 1925 house of lawyer Alfred J. Fletcher at 909 Glenwood Avenue, which features a Doric entry porch overlooking Fletcher Park, a Palladian gable window, and louvered wood shutters with decorative piercings in upper panels. The district's Colonial Revival houses often have Craftsman

interior features such as Craftsman mantels. A sub-set of Colonial Revival houses have gambrel roofs which evoke, directly or indirectly, the Dutch architecture of the Mid-Atlantic region. The ca. 1926 James R. Kee House at 611 Wills Forest Street is a handsome gambreled Colonial Revival residence with a first-story facing of richly colored sandstone and flanking sunrooms with paneled walls. The Colonial Revival style was resurrected in the 1970s and 1980s by developer Seth Gaskill, who employed it in the remodeling of eight Victorian and Craftsman houses in the Brooklyn neighborhood.¹⁵

Other period styles make cameo appearances in the district. The ca. 1923 home of lawyer James S. Fulghum at 615 Wills Forest Street represents the Tudor Revival style. Its defining features include false half-timbering in the clipped gable of a front wing, and pairs of plain wood porch posts yoked together at their tops by small arches. Simplified Tudor influence reemerged in the late 1930s with the construction of small picturesque houses known to students of North Carolina architecture as Period Cottages, illustrated by examples at 1213 Filmore Street and 519 Washington Street. The two-story stuccoed house at 1414 Glenwood Avenue, built about 1925, shows the influence of the Arts and Crafts movement.

Of interest in the context of the architectural development of the neighborhood were building contractors and carpenters who resided in the district. At least four building contractors are listed in city directories: Eugene W. Lloyd at 509 Cole Street; Julius H. Kenyon at 1201 Filmore Street; Addison M. Thompson at 706 Glenwood Avenue, and; Percy D. McLean at 510 Jefferson Street. There appears to be a connection between some of the more expressive Victorian cottages and original occupation by carpenters; for example, carpenter George H. Ruth lived at 808 Brooklyn Street, notable for its clever use of decoratively sawn weatherboards to mimic fish-scale wood shingles, and carpenter William S. Ford lived at 719 Gaston Street with its fanciful quatrefoil gable vents. In other respects both the Ruth and Ford houses are fairly conventional dwellings with triple-A gable roofs. The ca. 1915 house at 504 Adams Street, home of granite-cutter Howard W. Brown, has granite porch pillars carved by Brown. No architects are known to have lived in the district before 1940.¹⁶

The few houses that were built in the district between the end of World War II and the close of the

period of significance (1945-51) tended to perpetuate pre-war styles. In the 1950s taste shifted to the Ranch house type, of which a few examples were built in the district. (The Glenwood and Brooklyn neighborhoods had essentially filled up by the late 1920s, precluding substantial later construction.) The early 1950s therefore marks a divide in the district's architectural development. The late twentieth century has seen a growing interest in the rehabilitation of historic houses, and the most recent infill construction generally respects the architectural traditions of the district.

Verbal Boundary Description

The district boundaries are depicted on the two 1:140-scale maps that accompany the nomination.

Boundary Justification

The boundaries of the nominated parcel encompass those areas of the historic Glenwood and Brooklyn neighborhoods that retain sufficient integrity for listing. The district includes the majority of the area listed in the National Register of Historic Places in 1985 as the Glenwood Historic District with the exclusion of several parcels located along the original district's east edge on which stand post-1951 office buildings and apartment complexes. The expanded district includes portions of the Glenwood Land Company subdivision that were left out of the original nomination, specifically the majority of the historic Brooklyn neighborhood excepting lots along West Peace Street that have lost integrity.
